

C32/40 Ready-mix Concrete

Product information

Concrete is a composite material consists of cement, coarse and fine aggregates, water, and minor additives. When cement and aggregates mix with water, the mixture forms a fluid slurr which can be poured easily. The reaction between cement and water occurs and within several hours it hardens, forms a hard matrix binds. Concrete is transported to the construction sites via concrete mixers.

The declared product is C32/40 ready-mix concrete which compiles with the requirements. The density of the concrete is 2.33 tons per m³.

Detailed information

Registration number: S-P-05718

Status: Registered

Registration date: March 30, 2022

Version date: April 4, 2022

Valid until: March 28, 2027

Geographical scopes: Israel

Company information

Company Name: Readymix Industries (Israel) Ltd

Country: Israel
